AUTHOR INDEX

AdamEP
Adams, E. P.
Effect of soil compaction on development and yield of sugar beets ..... **11(3) 236**

AfanMM
Afanasiev, M. M.
Testing of inbred lines of sugar beets for resistance to Aphanomyces, Rhizoctonia and Fusarium root rots ..... 11(6) 542
Simulated hail injury to sugar beets ..... 11(3) 196

AlleHP
Alley, H. P.
The effects of dalapon on pectic substances and on root growth of sugar beets ..... 11(5) 365
Movement and persistence of endothal (3,6-endoxohexahydrophthalic acid) as influenced by soil texture, temperature, and moisture levels ..... 11(4) 287

AssalG
Assalini, G.
Ion exchange process for beet sugar refining I. Purification of beet diffusion juice ..... 11(4) 341
Ion exchange process for beet sugar refining II. Purification of sugar solutions ..... 11(4) 349

BandJD
Bandeen, J. D.
An investigation of the effects of various methods of herbicide application on weed control in sugar beets ..... 11(2) 151
Further studies on the control of weeds in sugar beets with herbicides ..... 11(2) 160

BarbRD
Barbour, Royal D.
Carbohydrate metabolism of sugar beets I. Respiratory catabolism of mono and disaccharides ..... 11(5) 436
Carbohydrate metabolism of sugar beets II. Catabolic pathways for acetate, glyoxylate, pyruvate, glucose and gluconate ..... 11(5) 443

BarmRD
Barmington, R. D.
Planter tests and seed preparation using monogerm sugar beet seed ..... 11(6) 469

BennCW
Bennett, C. W.
Acquisition and transmission of curly top virus by artificially fed beet leafhoppers ..... 11(8) 637

BennWH
Bennett, William H.
The variability of sugar beet constituents as influenced by year, location, variety, and nitrogen fertilization ..... 11(7) 547

BergeP
Bergen, P.
An improved method for the evaluation and selection of sugar beets (*Beta vulgaris* L.) I. The selection of individual plants ..... 11(8) 668
An evaluation of insecticides for control of the sugar beet root maggot in southern Alberta ..... 11(6) 485
A comparison of methods of applying heptachlor for control of the sugar beet root maggot in southern Alberta ..... 11(6) 491

BlakGR
Blake, G. R.
Effect of soil compaction on development and yield of sugar beets ..... 11(3) 236

BoawLC
Boawn, Louis C.
Yield and zinc content of sugar beets as affected by nitrogen source, rate of nitrogen, and zinc application ..... 11(4) 279

BoelDH
Boelter, D. H.
Effect of soil compaction on development and yield of sugar beets ..... 11(3) 236

BohmDW
Bohmont, D. W.
The effects of dalapon on pectic substances and on root growth of sugar beets ..... 11(5) 365
Movement and persistence of endothal (3.6-endoxohexahydrophthalic acid) as influenced by soil texture, temperature, and moisture levels ..... 11(4) 287

Ion exchange process for beet sugar refining II. Purification of sugar solutions ... 11(4) 349
BrewHE
Brewbaker, H. E.
Development of monogerm varieties of sugar beets by the backcross method ... 11(3) 252
BurtFC
Burton, Francis C.
An examination of the effectiveness of various sanitizing agents against yeasts isolated from liquid sugar and sucrose-corn syrup blends ... 11(5) 399
BushHL
Bush, H. L.
Comparison of statistical designs for a large number of entries of sugar beet strains ... 11(4) 306
Development of monogerm varieties of sugar beets by the backcross method ... 11(3) 252
ComeRD
Comes, R. D.
Movement and persistence of endothal (3,6-endoxohexahydrophthalic acid) as influenced by soil texture, temperature, and moisture levels ... 11(4) 287
ConwDE
Conwell, D. E.
Development of air conditioned, compartmented greenhouse ... 11(1) 44
CormCE
Cormany, C. E.
Use of unit block selection method for yield, sugar and purity in sugar beets ... 11(4) 323
CoudDC
Coudriet, D. C.
Beet leafhopper control in sugar beets by seed or soil treatment ... 11(1) 15
CrawCL
Crawford, C. L.
Yield and zinc content of sugar beets as affected by nitrogen source, rate of nitrogen, and zinc application ... 11(4) 279
DaviJF
Davis, J. F.
The effect of phosphorus fertilization and time of application on chemical composition of foliage and on yield, sucrose content and percent purity of sugar beet roots ... 11(5) 406
An analysis of production practices of sugar beet farmers in Michigan, 1958 ... 11(4) 313
DorsHE
Dorst, Howard E.
Experimental control of the beet leafhopper on sugar beets grown for seed ... 11(1) 12
DudlJW
Dudley, John W.
Population genetic studies on sodium and potassium in sugar beets (*Beta vulgaris* L.) ... 11(2) 97
Effects of sodium 2, 3-dichloroisobutyrate, a selective gametocide, on sugar beets ... 11(1) 25
DuffJE
Duffus, James E.
Effects of beet western and beet yellows viruses on amino acids in sugar beet ... 11(7) 629
EisFG
Eis, F. G.
Determination of microorganisms in sugar products by the Millipore method ... 11(2) 137
FifeJM
Fife, J. M.
Effects of beet western and beet yellows viruses on amino acids in sugar beet ... 11(7) 629
Changes in the concentration of amino acids in sugar beet plants induced by virus yellows ... 11(4) 327
FrankMG
Frakes, M. G.
An analysis of production practices of sugar beet farmers in Michigan, 1958 ... 11(4) 313

GaskJO
Gaskill, John O.
Tests of foreign introductions of *Beta vulgaris* L. for resistance to *Aphanomyces cochlioides* Drechs. and *Rhizoctonia solani* Kuehn ..... 11(8) 656
Artificial exposure of sugar beets to *Rhizoctonia solani* ..... 11(7) 574
Some chemical aspects of resistance to Cercospora leaf spot in sugar beets..... 11(6) 457
GoodAE
Goodban, A. E.
Effects of sugar beet nitrogen on juice purification ..... 11(6) 533
Some effects of virus yellows on sugar beet processing quality..... 11(2) 164
GreeDA
Greenwood, Delbert A.
The variabiilty of sugar beet constituents as influenced by year, location, variety, and nitrogen fertilization ..... 11(7) 547
GrifGD
Griffin, Gerald D.
Evaluation of Telone and D-D in relation to planting time and fallowing for control of sugar beet nematode, *Heterodera schachtii* Schmidt..... 11(6) 515
HaldHE
Halden, H. E.
Determination of microorganisms in sugar products by the Millipore method ..... 11(2) 137
HallRE
Hallbeck, R. E.
Preparation of melibiase-invertase for sugar beet molasses assay of raffinose..... 11(4) 302
HanzPC
Hanzas, P. C.
Saponin survey of various factories of the 1958 campaign..... 11(6) 519
HarpAM
Harper, A. M.
An evaluation of insecticides for control of the sugar beet root maggot in southern Alberta..... 11(6) 485
A comparison of methods of applying heptachlor for control of the sugar beet root maggot in southern Alberta..... 11(6) 491
HarriL
Harris, L.
Incidence of Rhizoctonia crown rot of sugar beets in irrigated crop rotation ..... 11(2) 128
HarriM
Harrison, Merle
Some chemical aspects of resistance to Cercospora leaf spot in sugar beets..... 11(6) 457
HeinSM
Heiner, Sylvester M.
The design, operation and economic evaluation of a gas-fired lime kiln..... 11(2) 168
HepwHM
Hepworth, H. M.
The effects of dalapon on pectic substances and on root growth of sugar beets ..... 11(5) 365
HillFJ
Hills, F. J.
Combinations of specific fungicides for sugar beet seed treatment..... 11(1) 75
HillOA
Hills, Orin A.
Beet leafhopper control in sugar beets by seed or soil treatment ..... 11(1) 15
HoffJC
Hoff, John C.
Northern California sugar beet quality survey..... 11(4) 358
HogaGJ
Hogaboam, G. J.
Plastic chambers for humidity and temperature control in vegetative propagation and growth of sugar beets ..... 11(8) 661
Radiographing as a method of observing some seed characters in monogerm sugar beet fruits..... 11(7) 605
HursRL
Hurst, Rex L.
The variability of sugar beet constitucnts as influenced by year, location, variety, and nitrogen fertilization ..... 11(7) 547
ImpeCW
Impey, C. Walter
Development of air conditioned, compartmented greenhouse..... 11(1) 44

JensLT
Jensen, L. T.
Bulk and liquid sugar production at the Brookfield (Chicago) Terminal ... 11(2) 143
JeweHK
Jewell, H. K.
Beet leafhopper control in sugar beets by seed or soil treatment ... 11(1) 15
JohnHP
Johnson, Harvey P. H.
President's message ... 11(1) 1
JohnJR
Johnson, J. R.
The occurrence and elimination of saponin in process juice ... 11(3) 201
The role of nitrites in promoting high ash values in white sugar ... 11(3) 258
JohnRT
Johnson, R. T.
Germination-emergence of sugar beet seed as affected by treatment and storage ... 11(8) 649
Studies on backcross generations and advanced generations of interspecific hybrids between *B. vulgaris* and *B. webbiana* ... 11(5) 429
JoneGE
Jones, G. E.
An investigation of the effects of various methods of herbicide application on weed control in sugar beets ... 11(2) 151
Further studies on the control of weeds in sugar beets with herbicides ... 11(2) 160
JorgEC
Jorgenson, Edsel C.
Evaluation of Telone and D-D in relation to planting time and fallowing for control of sugar beet nematode, *Heterodera schachtii* Schmidt ... 11(6) 515
KlooLa
Kloor, L. A.
The Impingatron seed treater ... 11(3) 189
KnowRE
Knowles, R. E.
Effects of sugar beet nitrogen on juice purification ... 11(6) 533
KohnRW
Kohn, R. W.
Saponin survey of various factories of the 1958 campaign ... 11(6) 519
LangeA
Lange, Alex, Jr.
The Impingatron seed treater ... 11(3) 189
LeacLD
Leach, L. D.
Combinations of specific fungicides for sugar beet seed treatment ... 11(1) 75
LeBaHM
LeBaron, Homer M.
The variability of sugar beet constituents as influenced by year, location, variety, and nitrogen fertilization ... 11(7) 547
LeetDD
Leethem, D. D.
Preparation of melibiase-invertase for sugar beet molasses assay of raffinose ... 11(4) 302
Determination of microorganisms in sugar products by the Millipore method ... 11(2) 137
LillCE
Lilly, C. E.
An evaluation of insecticides for control of the sugar beet root maggot in southern Alberta ... 11(6) 485
A comparison of methods of applying heptachlor for control of the sugar beet root maggot in southern Alberta ... 11(6) 491
LydaSD
Lyda, Stuart D.
Simulated hail injury to sugar beets ... 11(3) 196
MacWHS
MacWithey, H. S.
In vitro inoculation of sugar beet seedlings with *Aphanomyces cochlioides* Drechs. ... 11(4) 309
McAlDR
McAllister, DeVere R.
The variability of sugar beet constituents as influenced by year, location, variety, and nitrogen fertilization ... 11(7) 547

McCrRM
McCready, R. M.
Effects of sugar beet nitrogen on juice purification ..... 11(6) 533
Compositional changes in diffusion juices from stored sugar beets ..... 11(3) 206
Some effects of virus yellows on sugar beet processing quality ..... 11(2) 164
McFaJS
McFarlane, J. S.
New hybrid sugar beet varieties for California ..... 11(6) 500
MillIK
Mills, I. K.
Simulated hail injury to sugar beets ..... 11(3) 196
MorgAI
Morgan, A. I.
Effects of sugar beet nitrogen on juice purification ..... 11(6) 533
Some effects of virus yellows on sugar beet processing quality ..... 11(2) 164
MurpAM
Murphy, Albert M.
Increased yield and purity of hybrids from the Ovana fodder beet ..... 11(7) 565
New hybrid sugar beet varieties for California ..... 11(6) 500
Interaction of components of impurity and location in hybrids from inbred lines of sugar beets ..... 11(1) 37
NelsCE
Nelson, C. E.
Yield and zinc content of sugar beets as affected by nitrogen source, rate of nitrogen, and zinc application ..... 11(4) 279
NelsRT
Nelson, R. T.
Selection of sugar beets for tolerance to endothal herbicide ..... 11(2) 155
NemazJ
Nemazi, Joseph
A preliminary study of the relationship of the sugar beet nematode *Heterodera schachtii*, to three varieties of red tomatoes ..... 11(6) 482
NewtoW
Newton, Whitney, II
Bulk and liquid sugar production at the Brookfield (Chicago) Terminal ..... 11(2) 143
NichoG
Nichol, Grant
The effect of phosphorus fertilization and time of application on chemical composition of foliage and on yield, sucrose content and percent purity of sugar beet roots ..... 11(5) 406
NichPS
Nicholes, Paul S.
An examination of the effectiveness of various sanitizing agents against yeasts isolated from liquid sugar and sucrose-corn syrup blends ..... 11(5) 399
NielHM
Nielsen, Harold M.
The variability of sugar beet constituents as influenced by year, location, variety, and nitrogen fertilization ..... 11(7) 547
OgdeDB
Ogden, D. B.
Effect of soil compaction on development and yield of sugar beets ..... 11(3) 236
OhkiK
Ohki, Kenneth
Preparation and storage of beet pulp samples for sucrose analysis ..... 11(1) 68
OldeDL
Oldemeyer, Donald L.
Evaluation of combining ability in self-fertile lines of sugar beets using male-sterile testers ..... 11(2) 175
OldeRK
Oldemeyer, R. K.
Use of an annual tester for the monogerm conversion of inbred lines of sugar beets ..... 11(7) 591
Comparison of statistical designs for a large number of entries of sugar beet strains ..... 11(4) 306
Development of monogerm varieties of sugar beets by the backcross method ..... 11(3) 252
Selection of sugar beets for tolerance to endothal herbicide ..... 11(2) 155
OlsoLE
Olson, L. Elmer
The variability of sugar beet constituents as influenced by year, location, variety, and nitrogen fertilization ..... 11(7) 547

OwenFV
Owen, F. V.
Increased yield and purity of hybrids from the Ovana fodder beet ..... 11(1) 565
New hybrid sugar beet varieties for California ..... 11(6) 500
Interaction of components of impurity and location in hybrids from inbred lines of sugar beets ..... 11(1) 37
PaynMG
Payne, Merle G.
Some chemical-genetic studies pertaining to quality in sugar beets *(Beta vulgaris* L.) ..... 11(7) 610
Some chemical aspects of resistance to Cercospora leaf spot in sugar beets ..... 11(6) 457
PeteDF
Peterson, Donald F.
Effect of gibberellic acid on sucrose, purity and weight of sugar beets ..... 11(4) 320
Use of unit block selection method for yield, sugar and purity in sugar beets ..... 11(4) 323
PetoFH
Peto, F. H.
Processing monogerm seed ..... 11(4) 334
PierVG
Pierson, Victor G.
Artificial exposure of sugar beets to *Rhizoctonia solani* ..... 11(7) 574
PoweLR
Powers, LeRoy
Some chemical-genetic studies pertaining to quality in sugar beets *(Beta vulgaris* L.) ..... 11(7) 610
Population genetic studies on sodium and potassium in sugar beets *(Beta vulgaris* L.) ..... 11(2) 97
PriceF
Price, Frank
A continuous sugar centrifugal ..... 11(3) 243
RemmEE
Remmenga, E. E.
Some chemical-genetic studies pertaining to quality in sugar beets *(Beta vulgaris* L.) ..... 11(7) 610
RoreES
Rorem, E. S.
Compositional changes in diffusion juices from stored sugar beets ..... 11(3) 206
RushGE
Rush, George E.
Evaluation of combining ability in self-fertile lines of sugar beets using male-sterile testers ..... 11(2) 175
RyseGK
Ryser, George K.
Increased yield and purity of hybrids from the Ovana fodder beet ..... 11(7) 565
Interaction of components of impurity and location in hybrids from inbred lines of sugar beets ..... 11(1) 37
SavitH
Savitsky, Helen
Viable diploid, triploid and tetraploid hybrids between *Beta vulgaris* and species of the section *Patellares* ..... 11(3) 215
Meiosis in an F_1 hybrid between a Turkish wild beet *(Beta vulgaris,* ssp. *maritima)* and *Beta procumbens* ..... 11(1) 49
SaviVF
Savitsky, V. F.
Sucrose and weight of root in tetraploid monogerm and multigerm sugar beet populations under different mating systems ..... 11(8) 676
SchlRA
Schleusener, Richard A.
Hailstorm damage to crops in northeastern Colorado and an analysis of precipitation anomalies associated with a cloud-seeding program in 1959 ..... 11(5) 413
SchnCL
Schneider, C. L.
Tests of foreign introductions of *Beta vulgaris* L. for resistance to *Aphanomyces cochlioides* Drechs. and *Rhizoctonia solani* Kuehn ..... 11(8) 656
SchoKW
Schoenrock, Karlheinz, W. R.
The role of nitrites in promoting high ash values in white sugar ..... 11(3) 258

SchuML
Schuster, M. L.
Incidence of Rhizoctonia crown rot of sugar beets in irrigated crop rotation.... 11(2) 128

SexsJJ
Sexsmith, J. J.
Chemical control of wild oats (*Avena fatua* L.) in sugar beets ..... 11(3) 268

SharEL
Sharp, E. L.
Testing of inbred lines of sugar beets for resistance to Aphanomyces, Rhizoctonia and Fusarium root rots ..... 11(6) 542

SmitCH
Smith, C. H.

KEYWORD INDEX

EVALUATION OF COMBINING	ABILITY IN SELF-FERTILE LINES OF SUG	OLDEDL-60
T II. CATABOLIC PATHWAYS FOR	ACETATE, GLYOXYLATE, PYRUVATE, GLUCO	WANGCH-61
EFFECT OF GIBBERELLIC	ACID ON SUCROSE, PURITY AND WEIGHT O	PETEDF-61
N THE CONCENTRATION OF AMINO	ACIDS IN SUGAR BEET PLANTS INDUCED B	FIFEJM-61
EET YELLOWS VIRUSES ON AMINO	ACIDS IN SUGAR BEET	DUFFJE-61
	ACQUISITION AND TRANSMISSION OF CURL	BENNCW-62
VENESS OF VARIOUS SANITIZING	AGENTS AGAINST YEASTS ISOLATED FROM	NICHPS-61
DEVELOPMENT OF	AIR CONDITIONED, COMPARTMENTED GREEN	WOODRR-60
BEET ROOT MAGGOT IN SOUTHERN	ALBERTA	LILLCE-61
BEET ROOT MAGGOT IN SOUTHERN	ALBERTA	HARPAM-61
NGES IN THE CONCENTRATION OF	AMINO ACIDS IN SUGAR BEET PLANTS IND	FIFEJM-61
AND BEET YELLOWS VIRUSES ON	AMINO ACIDS IN SUGAR BEET	DUFFJE-61
NORTHEASTERN COLORADO AND AN	ANALYSIS OF PRECIPITATION ANOMALIES	SCHLRA-61
AN	ANALYSIS OF PRODUCTION PRACTICES OF	DAVIJF-61
EET PULP SAMPLES FOR SUCROSE	ANALYSIS	ULRICA-60
USE OF AN	ANNUAL TESTER FOR THE MONOGERM CONVE	OLDERK-61
AN ANALYSIS OF PRECIPITATION	ANOMALIES ASSOCIATED WITH A CLOUD-SE	SCHLRA-61
UGAR BEETS FOR RESISTANCE TO	APHANOMYCES, RHIZOCTONIA AND FUSARIU	AFANMM-61
OF SUGAR BEET SEEDLINGS WITH	APHANOMYCES COCHLIOIDES DRECHS.	MACWHS-61
ULGARIS L. FOR RESISTANCE TO	APHANOMYCES COCHLIOIDES DRECHS. AND R	SCHNCL-62
US FERTILIZATION AND TIME OF	APPLICATION ON CHEMICAL COMPOSITION	DAVIJF-61
, RATE OF NITROGEN, AND ZINC	APPLICATION	BOAWLC-61
VARIOUS METHODS OF HERBICIDE	APPLICATION ON WEED CONTROL IN SUGAR	BANDJD-60
	ARTIFICIAL EXPOSURE OF SUGAR BEETS T	PIERVG-61
ISSION OF CURLY TOP VIRUS BY	ARTIFICIALLY FED BEET LEAFHOPPERS	BENNCW-62
F NITRITES IN PROMOTING HIGH	ASH VALUES IN WHITE SUGAR	SCHOKW-60
TASE FOR SUGAR BEET MOLASSES	ASSAY OF RAFFINOSE	LEETDD-61
HEMICAL CONTROL OF WILD OATS	(AVENA FATUA L.) IN SUGAR BEETS	SEXSJJ-60
STUDIES ON	BACKCROSS GENERATIONS AND ADVANCED G	JOHNRT-61
IETIES OF SUGAR BEETS BY THE	BACKCROSS METHOD	BREWHE-60
EXPERIMENTAL CONTROL OF THE	BEET LEAFHOPPER ON SUGAR BEETS GROWN	DORSHE-60
	BEET LEAFHOPPER CONTROL IN SUGAR BEE	HILLOA-60
YBRID BETWEEN A TURKISH WILD	BEET (BETA VULGARIS, SSP. MARITIMA)	SAVITH-60
PREPARATION AND STORAGE OF	BEET PULP SAMPLES FOR SUCROSE ANALYS	ULRICA-60
ION EXCHANGE PROCESS FOR	BEET SUGAR REFINING I. PURIFICATION	ASSALG-61
REFINING I. PURIFICATION OF	BEET DIFFUSION JUICE	ASSALG-61
ION EXCHANGE PROCESS FOR	BEET SUGAR REFINING II. PURIFICATION	ASSALG-61
EFFECTS OF	BEET WESTERN AND BEET YELLOWS VIRUSE	DUFFJE-61
EFFECTS OF BEET WESTERN AND	BEET YELLOWS VIRUSES ON AMINO ACIDS	DUFFJE-61
THE COMPOSITION OF	BEET MOLASSES WITH PARTICULAR REFERE	STARJB-61
YBRIDS FROM THE OVANA FODDER	BEET	STOUTM-61
OP VIRUS BY ARTIFICIALLY FED	BEET LEAFHOPPERS	BENNCW-62
VULGARIS, SSP. MARITIMA) AND	BETA PROCUMBENS	SAVITH-60

SUGAR BEETS BY SEED OR SOIL
VIABLE DIPLOID,
IS IN AN F_1 HYBRID BETWEEN A
USE OF
TRITES IN PROMOTING HIGH ASH
THE
E INTERACTIONS OF SUGAR BEET
TERODERA SCHACHTII, TO THREE
NEW HYBRID SUGAR BEET
DEVELOPMENT OF MONOGERM
NFLUENCED BY YEAR, LOCATION,
Y AND TEMPERATURE CONTROL IN
ND TRANSMISSION OF CURLY TOP
SOME EFFECTS OF
SUGAR BEET PLANTS INDUCED BY
EET WESTERN AND BEET YELLOWS
HOUT COMPETITION FOR LIGHT,
OF HERBICIDE APPLICATION ON
ER STUDIES ON THE CONTROL OF
ACID ON SUCROSE, PURITY AND
SUCROSE AND
EFFECTS OF BEET
PROMOTING HIGH ASH VALUES IN
F_1 HYBRID BETWEEN A TURKISH
CHEMICAL CONTROL OF
ONSTITUENTS AS INFLUENCED BY
US SANITIZING AGENTS AGAINST
BEET PLANTS INDUCED BY VIRUS
CTS OF BEET WESTERN AND BEET
SOME EFFECTS OF VIRUS
OMPACTION ON DEVELOPMENT AND
T BLOCK SELECTION METHOD FOR
OMPOSITION OF FOLIAGE AND ON
INCREASED
YIELD AND
OURCE, RATE OF NITROGEN, AND

TESTS OF FOREIGN INTRODUCTIONS OF BE SCHNCL-62
TESTS AND SEED PREPARATION USING MON BARMRD-61
TETRAPLOID HYBRIDS BETWEEN BETA VULG SAVITH-60
TETRAPLOID MONOGERM AND MULTIGERM SU SAVIVF-62
TEXTURE, , TEMPERATURE, AND MOISTURE COMERD-61
TIME AND FALLOWING FOR CONTROL OF SU JORGEC-61
TIME OF APPLICATION ON CHEMICAL COMP DAVIJF-61
TOLERANCE TO ENDOTHAL HERBICIDE NELSRT-60
TOMATOES NEMAZJ-61
TRANSMISSION OF CURLY TOP VIRUS BY A BENNCW-62
TREATER KLOOLA-60
TREATMENT AND STORAGE WHEAGW-62
TREATMENT LEACLD-60
TREATMENT HILLOA-60
TRIPLOID AND TETRAPLOID HYBRIDS BETW SAVITH-60
TURKISH WILD BEET (BETA VULGARIS, SS SAVITH-60
UNIT BLOCK SELECTION METHOD FOR YIEL PETEDF-61
VALUES IN WHITE SUGAR SCHOKW-60
VARIABILITY OF SUGAR BEET PLANTS GRO ULRICA-61
VARIABILITY OF SUGAR BEET CONSTITUEN MCALDR-61
VARIETIES IN SIMULATED CLIMATES ULRICA-61
VARIETIES OF RED TOMATOES NEMAZJ-61
VARIETIES FOR CALIFORNIA MCFAJS-61
VARIETIES OF SUGAR BEETS BY THE BACK BREWHE-60
VARIETY CLIMATE INTERACTIONS OF SUGA ULRICA-61
VARIETY, AND NITROGEN FERTILIZATION MCALDR-61
VEGETATIVE PROPAGATION AND GROWTH OF HOGAGJ-62
VIABLE DIPLOID, TRIPLOID AND TETRAPL SAVITH-60
VIRUS BY ARTIFICIALLY FED BEET LEAFH BENNCW-62
VIRUS YELLOWS ON SUGAR BEET PROCESSI GOODAE-60
VIRUS YELLOWS FIFEJM-61
VIRUSES ON AMINO ACIDS IN SUGAR BEET DUFFJE-61
WATER AND NUTRIENTS ULRICA-61
WEED CONTROL IN SUGAR BEETS BANDJD-60
WEEDS IN SUGAR BEETS WITH HERBICIDES BANDJD-60
WEIGHT OF SUGAR BEETS PETEDF-61
WEIGHT OF ROOT IN TETRAPLOID MONOGER SAVIVF-62
WESTERN AND BEET YELLOWS VIRUSES ON DUFFJE-61
WHITE SUGAR SCHOKW-60
WILD BEET (BETA VULGARIS, SSP. MARIT SAVITH-60
WILD OATS (AVENA FATUA L.) IN SUGAR SEXSJJ-60
YEAR, LOCATION, VARIETY, AND NITROG MCALDR-61
YEASTS ISOLATED FROM LIQUID SUGAR AN NICHPS-61
YELLOWS FIFEJM-61
YELLOWS VIRUSES ON AMINO ACIDS IN SU DUFFJE-61
YELLOWS ON SUGAR BEET PROCESSING QUA GOODAE-60
YIELD OF SUGAR BEETS BLAKGR-60
YIELD AND ZINC CONTENT OF SUGAR BEET BOAWLC-61
YIELD, SUGAR AND PURITY IN SUGAR BE PETEDF-61
YIELD, SUCROSE CONTENT AND PERCENT DAVIJF-61
YIELD AND PURITY OF HYBRIDS FROM THE STOUTM-61
ZINC CONTENT OF SUGAR BEETS AS AFFEC BOAWLC-61
ZINC APPLICATION BOAWLC-61
